Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-12, 15-31, 34-50 and 52-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Allen, Jr, et al. (US 2001/0017861).

2. Regarding claims 1, 4-12, 15-31, 34-50 and 52-55, Allen discloses a system for connecting a call having call signaling and user communications (Figure 5). The system comprises a signaling processor (item 30) to receive and process call signaling to select an ATM connection for user communications and to transmit a call control message identifying the selected ATM connection (para. 26, lines 1-6). The system also comprises an ATM matrix (Figure 5, item 26) to receive the user communications over another ATM connection (note: connection from item 28), to receive the control message from the signaling processor

Art Unit: 2666

and in response, connect the user communications over the selected ATM connection (para. 70, lines 7-12). A first switching system (item 20 or 22) originates user communications and interworking units (items 28) respond to control messages (Figure 5, ISUP).

Allowable Subject Matter

3. Claim 2-3, 13-14, 32-33 and 51, objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chu et al. (US 5,956,334) and Doshi et al. (US 5,568,475) each discloses an ATM system carrying narrowband communications..
